

LEADING GOVERNMENT IT SOLUTIONS

Cutting-Edge IT Solutions and Consulting Services Tailored for Federal Government Agencies

www.i1systemnetlogic.com

Who We Are

i1System Netlogic LLC is a recognized Small Disadvantaged Business (SDB) under the SBA's 8(a) program, formed as a joint venture between i1 System Corp and Netlogic Solutions Inc. Together, we provide premier information technology and professional consulting services to the federal government. With over 20 years of combined experience, we specialize in developing and implementing custom IT systems and Commercial Off-The-Shelf (COTS) products. Our expertise spans Business Intelligence (BI), Data Analytics, Data Warehousing (DW) solutions, and IT modernization. We take pride in our track record of delivering projects on time and within budget. Our comprehensive services include guiding clients from conception and design through development, implementation, and ongoing support. Technology agnostic, we offer proven capabilities and successes to meet diverse client needs.

Your Ultimate Partner for IT Mission Success!

Begin your journey towards excellence with i1System Netlogic as your trusted partner! We stand ready as your go-to experts, equipped to address your mission-critical challenges with unparalleled proficiency and unwavering reliability. Our expertise shines in essential domains such as Software Development, Database Management, Data Science & Engineering, Project Management, Cloud Services, Systems Integration, and Systems Security. Together, let's conquer challenges and reach new heights of success!

Core Competencies

- ✓ Cutting-edge technology solutions tailored to meet specific business needs
- ✓ Expertise in custom software development, data analytics, BI tools
- ✓ LogicVU – Platform agnostic in-house developed self-service Business Intelligence (BI) tool
- ✓ Cloud computing solutions for scalability, efficiency, and cost-effectiveness
- ✓ Integration services to streamline workflows and enhance productivity
- ✓ Commitment to innovation with IT modernization and staying ahead of industry trends
- ✓ Promotes continual innovation and dedicates itself to continuous research and development, introducing new features, functionalities, and enhancements to existing solutions. This proactive approach keeps us ahead of competitors and ensures we meet the evolving needs of our clients.

Past Performance

Department of Labor (DOL)

- ✔ i1System Netlogic team delivers a Unified Management System (**UMS**) to the DOL Office of Job Corps (**OJC**) and Office of Financial Administration (**OFA**), enhancing budget planning, financial management, and reporting functionalities. This modernized financial system has significantly boosted efficiency and reliability, guaranteeing seamless delivery of essential services for OJC's career training programs across the nation.
- ✔ Developed SPARQ, a Case Management System tailored for DOL **ETA**, ensuring SCSEP's grantees receive consistent, timely, and relevant services. SPARQ facilitates the electronic entry and submission of participant data, covering entry, training, exit, and evaluation metrics. Utilizing machine-centric services, a cloud computing system was implemented for SPARQ, offering Infrastructure as a Service (IaaS) for on-demand infrastructure provision.
- ✔ Successfully implemented a reliable, timely, and cost-effective BI system using our custom built **LogicVU** tool.

United States Department of Agriculture (USDA)

- ✔ Offered Project Management (**PM**) assistance to the WIC Program Integrity and Monitoring Branch (**PIMB**) across multiple **OIT** projects. Ensured tasks were executed collaboratively with PIMB and adhered to relevant FNS and USDA departmental mandates, policies, and guidelines.
- ✔ Collaborated with the Food and Nutrition Service (**FNS**) at the USDA to improve the Professional Standards Training Tracker Tool (**PSTTT**) 2.0, utilizing SQL-server databases and Agile methodologies. This enhancement aimed to streamline training management for school nutrition professionals, aligning with the Healthy, Hunger-Free Kids Act. Our efforts enhanced compliance and accessibility, ultimately benefiting states and schools across the nation.

United States Patent and Trademark Office (USPTO)

- ✔ Deployed Oracle Exadata and Goldengate technologies at USPTO to resolve performance concerns and enable real-time data replication for crucial databases like PALM and IFW. Showcasing expertise in Oracle technologies, we fine-tuned database performance and facilitated real-time replication, thereby improving data integrity and availability for vital infrastructure databases at USPTO. These enhancements significantly bolstered mission-critical operations.

Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF)

- ✔ The deployment of ATF Analytics, Data Warehouse, and Business Intelligence Systems at ATF was spearheaded by i1System Netlogic. Through collaboration with ATF SMEs across 28 disparate systems, providing 360-degree view of the Bureau and a single-source of truth, we have gained invaluable expertise in enhancing ATF's analytical capabilities.

Differentiators

- Provides revolutionary solutions leveraging cutting-edge technologies including AI, ML, Blockchain, IoT, and quantum computing.
- Demonstrates agility in adapting to rapidly changing technological landscapes and client requirements, enabling quick deployment and implementation of solutions.
- Delivers highly adaptable solutions crafted to address the unique requirements and obstacles of every client, guaranteeing peak performance and efficiency.
- Prioritizes robust security measures and protocols to protect sensitive data and systems against cyber threats, ensuring compliance with industry regulations and standards.
- Establishing itself as a thought leader in emerging technologies, the company actively contributes to industry forums, publishes research papers, and engages in conferences and events.

Why Choose iSystem Netlogic?

At iSystem Netlogic, we offer unparalleled expertise and dedication in providing information technology and professional consulting services to the federal government.

Outstanding Project Delivery: We excel in project delivery through innovation, collaboration, agility, clear communication, and a track record of on-time, on-budget execution.

Commitment to Quality: Our ISO certification distinguishes us, showcasing our unwavering dedication to the highest standards and ensuring superior quality, security, and exceptional project value.

Proven Partnership: We bring proven partnerships with industry and academia, infusing innovation and expertise into scalable end-to-end solutions.

Specialized Expertise: Our core competency lies in the development and implementation of custom IT systems, with a specialized focus on Business Intelligence (BI), Data Analytics, and Data Warehousing (DW) solutions. We possess the expertise needed to address complex technological challenges and deliver innovative solutions that meet our clients' unique needs.

Comprehensive Services: From concept and design to development, implementation, and ongoing support, iSystem Netlogic provides end-to-end services to ensure that our clients' objectives are met at every stage of the project lifecycle. We are committed to providing comprehensive solutions that drive success.

Proven Track Record: iSystem Netlogic boasts a track record of success in delivering tailored solutions to our clients in the government sector. Our demonstrable success stories speak in volumes about our capability to achieve tangible results.

Industry-Leading Technologies: We leverage industry-leading technologies, including the Microsoft, AWS, Oracle, and Linux software suites, to deliver cutting-edge solutions. Whether it is on-premises deployment or Cloud based solutions, we have the expertise to implement the right technology for your needs.

Experienced Professionals: Our team comprises hand-picked security cleared for sensitive and classified work professionals with proven client-oriented track records.

Collaborative Approach: At iSystem Netlogic, we believe in working closely with our clients to understand their unique challenges and objectives. We collaborate side by side with our clients, addressing their most sensitive and complex issues, and developing solutions that fuel their success.
